

Daniel Lagos

Full Stack Developer

Artist Statement

"I see opportunity in failure, improvement in trial and beauty in progress."

Profile

I'm cheerful and passionate individual, who enjoys challenging himself in every step he takes. I look forward to perfecting my coding skills as well as designing ones. as UX my visual skills must be strong and the only way to get there is by practice.

Interest

I have a variety of interests, but the most important are the ones related to music, technology, and gaming. All of these interests effect practice and failure to get to master them.

Education

Interactive Media & Design, Algonquin college

January 18 2018- Present

MountDouglas

January 2013-June 2016

Experience

ESDC - (GT3) Front developer

July 2019 - October 2019

Developed, updated & edited online courses for the ESDC in the Canadian Government. Duties consisted in web designing and developing around bootstrap and frameworks structure.

Let's go pow-wow - Learning Application

June 2018 - November 2018

Wire framed, researched and used provided code for a learning application. The main purpose of this app was to spread the Algonquin language to new generations.

Memory - final assignment for Client-side Web-development

August 2018

Wireframe and coded a memory game, with HTML, CSS, and Javascript. With the main focus of CSS customization and CSS animation
